Los Angeles 54, California

Dear Mr. Morris:

Thank you for your letter of 6 June 1952, containing detailed results of the additional tests conducted by your Department to determine possible radio interference effects adjacent to the station of the Foreign Broadcast Information Service.

While we are in general agreement that radio interference at distances of 2,800 feet is not usually encountered from power lines of the proposed type, there are certain aspects of the present situation over which we still feel some concern. These are reviewed in the attached comments prepared by our technical advisors after study of the data you forwarded. We are prepared, however, to modify our previous position provided we may be assured by your Department that should interference from the new power line occur after its activation, your Department will undertake without delay to install appropriate filters and take such other steps as may be necessary to correct the difficulty.

If such an agreement is acceptable to you, we would appreciate hearing from you to this effect and will thereupon advise the Los Angeles City Council that our previous objections are withdrawn.

Sincerely,

George G. Carvey
